HOW TO USE THIS BOOK

This book is meant to help the gamemasters of cyberpunk tabletop role-playing games cut down their prep time. These random tables add details to campaigns and sessions with a roll of the dice.

First are names. Cyberpunk usually involves mega-corporations and nightclubs, so names for those have been provided. Next are names for Americans and Europeans. Wherever possible the names chosen are currently popular baby names, so in near future settings those will be the names of adults.

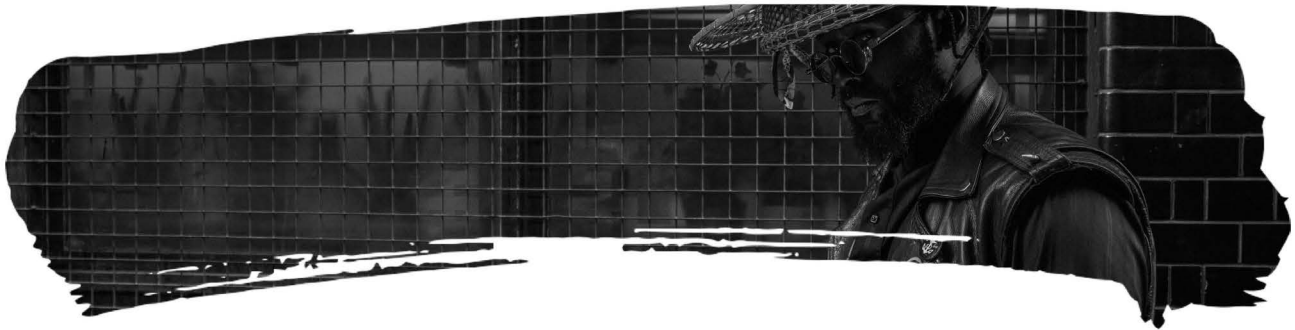

Since players want to search every room they enter, there are a number of tables for common locations. These random tables will include both items and story hooks. Also, included are two tables of street food from around the world. These tables help GMs to mix in more of the globalization flavor that is present in cyberpunk games.

In the Hacking & Cybernetics section are a couple of tables meant to spice up situations that tend to be glossed over occasionally. Providing more complications for players always amps up the fun.

The last two tables are the most detailed. The Nightclub Encounters and Rumors and Odd Jobs provide story hooks and situations to challenge the players and give life to the campaigns. Use these tables to run games without prep or to give current games an extra boost.

With these random tables and your imagination, you'll be all set to run epic cyberpunk campaigns. If you are ready, then jack in and explore cyberspace.
